---

While a town is in a state of alert, the monster of the sea keeps mutating the townspeople at an alarming rate. A researcher finds a genetic disorder that has been caused by a chemical that has been dumped into the water that has caused the creature to have an alarming appetite. ~Spoiler~

Humanoids From the Deep is a remake of a film from 1980 that I haven't seen (yet). I can only imagine that it's better than this version. Here's the lowdown: The government (who else) has created fish men that escape and are able to survive in the ocean because of chemical dumping. Naturally, like fish men do, they like to eat people and mate with women. The only thing separating this from a Sci-fi Channel Original is the gore effects. They are nicely done and the only real stand-out of the picture. I want to say the acting caliber is better, but Robert Carradine was just in one of their crappy Sabretooth movies. Don't get me wrong, I like Robert Carradine, he's just been in some stinkers. Also showing up and slumming it are Mark Rolston (the guy was in Aliens for crying out loud) and Clint Howard (and to say this guy is slumming it should tell you something). Basically the government comes in and makes the situation worse so our band of heroes has to stop the fish men themselves. You've seen it before. From the careful hands of Roger Corman, comes a remake of his 1980's produced film of the same name, slightly updated, slightly better, but just as cheap.

Suffering from that awful nineties glare of bad jeans and over acting, this remake offers quite a few decent moments, hilarious monsters, and unintentional dialogue that actually helps to get you through it.

In a nutshell - Scripting and story is so messed up you can't help feel like you've been thrown in at the deep end from the very beginning. Hilarious acting and dialogue make sure you enjoy this low budget cheese-fest that entertains for all the wrong reasons!

In my opinion - Certain movies should never be remade. This is one of them! With a storyline that is more classic 60's sci-fi than anything, the reasoning behind it all seems to be lost in its nineties setting. That said, this is small town America, where strange stuff happens all the time and the locals all dress alike...

To be fair, its leading man, Robert Carridine is quite a likable guy and comes across quite well for the most of it. Everyone else though, not so much, and you can't help not caring for them in the long run. The film hints at action with some scenes as it tries to do with horror, but most of the scary scenes are done with such amateurish direction, it comes across more comical in a sense which makes it less horrific.

The remake of Humanoids From The Deep is fun, in a strange sort of way. Just don't take it too seriously! 646f9e108c
